## OUR HISTORY AS A NATION AT A GLANCE

Work in Pictured Records Further Described.

The first announcement of Cansoup's United States History and Synchronic Charts was made yesterday. In this issue will be found a further description of this surprising work, with coupon, which no one should fail to clip. It is singular that our own nation should be the first to have its history pictored and made visible, so that "he who runs may read." But it is only

another example of those bright and ingenious American ideas by which civilization is being advanced.

When you see the work the same query will arise in your own mind, as it has in hundreds of others, how is it that the history of a country could have taken such concrete form in the mind of any man and to have enabled him to present the whole span to the eye in one glance? It has been well called a "work of genjus."

December I is the regular pay day for the District employes, and many of the government clerks. Some departments pay off on the 2d of the month. But Uncle Sam isn't going to loosen up his purse strings two days in advance to make easy turkey and cranberry distipations, and neither is Auditor Tweedale, of the District.

# The Peevish Child **Needs a Laxative**

It is natural for a child to laugh and play, and when it sulks drowsily or cries you may depend on it, something physical is the matter. If you see no evidences of a serious aliment you will not be wrong if you quietly give it a dose of mild laxative that evening on putting it to bed.

The remedy most generally recommended for this purpose is Dr. Caldwell's Syrup Papain, which mothes the thousands who have written the dose that they will never be without it are thoughout the country have been giving their children for a quarter of a century. To-day thousands of families are using it where hundreds used it them, and there must be gued reason for this word of mouth recommendation.
